

CN18 CN18

INDUSTRIAL TERMINAL

PLC

TECHNICAL DATAS

CN18 is a Numerical Control consisting in an industrial terminal and a PLC with axis boards.

The thinness of this product allows to fit it in all electrical boxes and panels.

In the developing of the product, it was paid attention on the frontal part. It is suitable for industrial places. It's sprinkleproof and resistant to chemical agents, with IP64 protection for the key-board.

The white and black LCD display is semigraphic.

In compliance with  standards.

ISO 9001-2000 CERTIFICATION

Certificato Nr 50 100 1394

PLC DATAS

- Up to 72 Inputs and 72 outputs
- 256 Inside logical memories.
- 512 memories for the sincronization with the axes management.
- 256 One-shot memories
- 100 Variabiles at 32 bit not tamponed.
- 100 Variabiles at 32 bit tamponed.
- 64 Timer
- 4 Counter
- Refresh Time of 18 ms
- Program memory upto 32K, in the Basic version.
- 2/4/6 axes
- Linear, round and helicoidal interpolations.
- Master/salve axes; Gantry axes.
- Positions reading by increasing encoders.
- Integrated management of the SW and HW end of stroke limits.
